

## Bottles, glass, general purpose square, screw neck

02

Square bottles for compact and economical storage, shaped to ensure a positive grip and available in clear or amber glass.

The narrow neck version is provided with a transparent pouring ring and dust protection cap. Only the original closure cap is screwed firmly onto the bottle thread topped by the pouring ring, which also acts as a sealing ring. The cap engages in the lugs at the bottom of the neck thus giving it its original closure. When opening for the first time the cap tears away from the perforated ring at the lower closure edge, leaving the ring resting at the bottom of the neck. After the removal of the ring, the bottle can be resealed with the remaining normal screw cap. Screw caps must be purchased separately.

### Clear, narrow neck
